

SEAL

PRODUCT FEATURES

- Minimum food holding temperature of 72°C
- Thermostatic control allows base heat to be adjusted to suit a variety of food products
- Aluminium surface for energy-efficient heat conduction
- An affordable choice for when overhead heat and illumination is not needed — for example where covered dishes are served
- Robust stainless steel construction — hygienic and easy to clean

The Seal Heated Display Base is an affordable choice where overhead heat and illumination is not required, for example where covered dishes are served. With a minimum food holding temperature of 72°C, the thermostatic control allows base heat to be adjusted to suit a variety of food products. It's ideal for numerous uses such as front of house in smaller hotels for breakfast goods, carveries in small pubs and restaurants, and anywhere else you want to offer customers self service.
